Nose Wiping Procedure

Every time when you wipe a child’s nose, wash your hands to reduce the spread of colds.

If you cannot wash your hands after every nose wipe, use an alcohol-based hand rub. (See-How to clean hands with alcohol based hand rub procedure)

It is not necessary to wear gloves when wiping a child’s nose. If you do wear gloves, you must remove your gloves and wash your hands or use an alcohol-based hand rub afterwards.

Dispose of dirty tissues immediately.
