Toys Cleaning Procedure

All the toys and play equipment both used indoor and outdoor should be cleaned regularly, unless children put them in their mouth, sneeze on it, the toy has been used by a child who is unwell or there is an outbreak of an infectious disease, then they should be cleaned immediately. All toys should be thoroughly cleaned before going into storage and as play experience changes.

Cleaning methods

(Depending on the type of toy, use one of the following methods)

- Toy is soaked for ten minutes in hot water and disinfectant (kept in the laundry), then allowed to air dry
- Toy is thoroughly sprayed with disinfectant, then wiped down with paper towel
- Toys are washed through the use of washing machine (warm water and laundry powder) then dried using the dryer
- Books should be inspected for visible dirt and cleaned by wiping with moist paper towel with soapy water on it and allowing it to dry.
- Dress–up clothes should be washed once a week through the use of washing machine (warm water and laundry powder and when they are visibly dirty.

Please, do not forget to fill in the Toy Cleaning List and record the date, a toy, cleaning method used and your name.
